

VÕ THỊ HỒNG THU

Junior Data Analyst

0368680405 | vohongthu05@gmail.com | District 7, Ho Chi Minh City | [Portfolio](#)

CAREER OBJECTIVE

Final-year Financial Technology student with hands-on data projects: customer segmentation on 887K loans and late-delivery prediction on 829K orders, using Python, PySpark, MongoDB and Scikit-Learn. Seeking a Junior Data Analyst position to turn complex data into clear, actionable business insights.

PROJECTS

Delivery Delay Prediction & Operational Cost Optimization | *Python, PySpark, MongoDB, Dash, Scikit-Learn, Open-Meteo API*

- Cleaned 931K raw delivery orders to 829K (invalid timestamps, abnormal GPS, outliers); engineered features: distance, time slots, hourly weather (Open-Meteo API), holidays, rain × rush-hour interactions.
- Built a lambda-style pipeline: batch KPIs and PySpark Structured Streaming micro-batches stored in MongoDB Atlas, with an auto-refreshing Dash dashboard.
- Logistic Regression (balanced) predicts late orders with AUC 0.826 on 164K test orders (late class: precision 0.93, recall 0.74).
- Simulated cost impact under stated assumptions: 21.95% lower late-delivery cost (11.6%–32.3% in sensitivity analysis).

P2P Lending Customer Segmentation | *Python, Pandas, Scikit-Learn, Kaggle API*

- Processed 887K Lending Club loans (2007–2015, 17 features): median imputation, 1st–99th percentile capping, standardization.
- Selected $k=3$ using Silhouette, Davies-Bouldin and Calinski-Harabasz scores; MiniBatchKMeans produced low-risk (39.6%, avg rate 9.3%), small high-cost (36.0%, 15.4%) and large higher-risk (24.4%, 16.5%) segments.
- Profiled each segment by interest rate, loan size and term to support credit-risk pricing decisions.

WORK EXPERIENCE

FinTech Intern | **Nam A Bank, Digital Solutions Department** 03/2026 – 08/2026

- Analyzed digital banking workflows, customer journeys and payment processes to identify process pain points and improvement areas.
- Researched Open Banking and API integration; documented system processes and partner connection flows with workflow diagrams and reports.
- Reviewed operational processes to flag potential issues in system workflows.

Barista | **The Coffee House** 03/2025 – 02/2026

- Resolved order and payment issues and coordinated with the team to keep peak-hour operations running smoothly.

Sales Associate | **Texas Chicken** 05/2024 – 11/2024

- Processed orders and payments accurately via POS system and supported customers in a fast-paced environment.

EDUCATION

University of Finance and Marketing (UFM) | Financial Technology Sep 2023 – Present

SKILLS

Data & Programming: SQL, Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn), PySpark, MongoDB

Analysis: EDA, Data Cleaning & Validation, Clustering, Classification (Logistic Regression), Model Evaluation, Reporting & Insights

Visualization & Tools: Plotly Dash, Advanced Excel (MOS Certified), PowerPoint

Soft skills: Critical Thinking, Analytical Skills, Attention to Detail, Problem-solving, Time Management, Teamwork

CERTIFICATIONS

- Google Data Analytics Professional Certificate (09/2026)
- Microsoft Office Specialist: Excel Associate and Word Associate, Microsoft 365 Apps (09/2025)
- Get Into Tech Vietnam (03/2026) | AIESEC: Data Analysis Course (03/2023)
- Aptis English Certificate, British Council: B1
